Product Overview

Automotive HVAC Control

This blower motor speed regulator, also known as a heater blower resistor, is a critical component for automotive HVAC systems. It provides precise control over the blower motor speed, allowing for accurate airflow adjustment within the vehicle cabin. Engineered to meet or exceed OEM specifications, this unit features an integrated heat sink for efficient thermal management and reliable long-term performance.

Technical Specifications

Compatible Models

- Peugeot 308
- Peugeot RCZ
- Citroen C4
- Citroen DS4

OE Part Numbers

6441.AA, 6441AA

Design & Construction

Key Features

Heat Sink Integration • Durable Plastic Casing • OEM Specification Match • Secure Electrical Connectors
