

Automotive Diagnostic Interface Cable for VAG Vehicles

This diagnostic interface cable allows communication with various vehicle modules in VW and Audi group vehicles. It supports reading and writing data for PC-based diagnostics and adjustments.

Product Overview

Professional Diagnostic Capabilities

The VAG CAN Commander 5.1 is a comprehensive diagnostic interface designed for seamless communication between your computer and vehicles within the VW, Audi, Seat, and Skoda groups. It enables users to perform advanced tasks including reading live data, accessing immobilizer security codes, and reading or clearing diagnostic trouble codes. This plug-and-play solution requires no external batteries or adapters, making it an efficient tool for automotive maintenance and adjustment.
