Product Overview

Professional Diagnostic Interface

This high-performance vehicle network interface connects your laptop directly to the vehicle's Bus Network via the OBD-II connector. It is designed to provide professional-grade diagnostics and module programming capabilities for specific Jaguar and Land Rover models. Compact and reliable, this pass-thru device utilizes the SAE J2534-1 API to facilitate communication with third-party diagnostic applications and dealer-level software.

Compatibility

Model Years Supported

Make	Year Range
Jaguar	1999 & Up
Land Rover	2005 & Up

Supported Brands	Jaguar, Land Rover
------------------	--------------------

Technical Specifications

Operating Temperature

0 C Min Temp	70 C Max Temp
------------------------	-------------------------

Host Interface	Full-speed 12 mbps USB 2.0
Power Supply	Bus-powered by USB
Dimensions	3" x 1.75"

Protocols & Compliance

Supported Protocols

- CAN Bus
- ISO9141
- SAE J2534-1

Compliance

J2534 • J2534-1 • OBD2 • EOBD2
