

Automotive Door Side Panel Mold

This precision-engineered mold is specifically designed for creating automotive door side panels. It allows for mass production with high accuracy, incorporating intricate details and features for complex shapes and textures.

Product Overview

Precision Automotive Door Side Panel Mould

This high-precision injection mould is engineered specifically for the mass production of automotive door side panels. Designed to handle complex geometries, it incorporates detailed features for integrated components such as control buttons, vents, and switches. Built for durability and consistent output, this mould ensures high accuracy and repeatability for automotive interior manufacturing.

Certifications & Standards

Quality Certifications

ISO 9001:2008

Capabilities

Mold Specializations

- Plastic Injection Molds
- Die Casting Molds
- Automotive Parts Molds
- Precision Mold Spare Parts

Technical Services

- Mold Design
- R&D Support
- Laboratory Testing
- Process Innovation

Production Standards

Management Standards

ERP Integrated • Standardized Process Management • Quality Control • On-time Delivery

Industry Compatibility

Compatible Sectors

Automotive, Semiconductor, Electrical Connection, Motor Fixed Rotor
