

Automotive Engine Timing Belt 163S8M27

This high-performance timing belt is designed for automotive engine applications. It ensures the precise synchronization of engine components for optimal performance and reliability.

Product Overview

High-Performance Timing Belt

The 163S8M27 automotive timing belt is engineered for precise synchronization of engine components, ensuring optimal reliability and performance. Constructed from high-grade chloroprene rubber, this belt is designed to withstand the demanding operating conditions and high temperatures typical of automotive engines. It serves as a durable replacement part, helping to maintain engine efficiency over a lifespan of 30,000 to 80,000 kilometers.

Technical Specifications

OE Number	13568-09040
Item Code	163S8M27
Material	Chloroprene rubber
Compatible Vehicle Make	TOYOTA

Performance & Logistics

Expected Lifespan

30000 KMS

Minimum

80000 KMS

Maximum

Packaging

- Standard Exporting Carton
- Box
- Bag

Delivery Time

30 days
