

Automotive Grille, Bumper, and Car Key Mold

This precision-engineered mold is designed for manufacturing automotive grilles, bumpers, and car keys. It ensures high accuracy and repeatability in the production of these components.

Product Overview

Precision Automotive Molding Solutions

This high-precision mold is engineered for the reliable manufacturing of automotive components, including grilles, bumpers, and car keys. Designed for high-volume production environments, it ensures exceptional accuracy, repeatability, and durability. The mold supports advanced manufacturing processes, providing consistent performance to meet stringent automotive quality standards.

Manufacturing Capabilities

Technical Specializations

- Semiconductor molds
- IC connector molds
- Lead frame electrical connection molds
- Motor fixed rotor molds
- Precision mold spare parts

Supported Mold Types

Automotive Grille Mold, Bumper Mold, Car Key Mold, Injection Mold, Die Casting Mold

Quality & Standards

Certifications

ISO 9001:2008

Quality Assurance

- In-house laboratory and testing center
- Standardized ERP management system
- Continuous R&D process improvement
- Strict process and delivery control

Industry Compatibility

Industry Applications

Automotive, Electronics, Precision Engineering
