

Automotive Heater Core

High-performance heater core designed for efficient heat transfer and reliable performance in automotive heating systems. It features durable construction with aluminum fins and tubes for optimal thermal conductivity.

Product Overview

High-Efficiency Automotive Heater Core

This automotive heater core is engineered for efficient heat transfer and reliable performance within vehicle climate control systems. Constructed with durable aluminum fins and tubes, it ensures optimal thermal conductivity and rapid heating capability. Designed to meet or exceed OEM specifications, this unit offers a precise fit and robust durability to withstand the pressures and temperatures of automotive environments.

Technical Specifications

Core Dimensions

200 mm
Length

159 mm
Width

48 mm
Thickness

Compatibility

Vehicle Application

Make	Model	Year Range
Mitsubishi	Pajero V4	1991-1999

Identification
