

Automotive Ignition Switch

Automotive ignition switches are essential for starting a vehicle. They also control the vehicle's electrical systems.

Product Overview

Automotive Ignition Switch Solutions

This high-quality automotive ignition switch is designed for reliable vehicle starting and electrical system control. It is engineered to support a wide range of Korean and European vehicle models, ensuring broad compatibility for diverse automotive repair and maintenance needs. With a focus on durability and performance, this component provides a dependable solution for professional automotive applications.

Compatibility

Supported Vehicle Models

- H100
- ATOS
- BONGO3
- Mercedes-Benz Trucks

Vehicle Segments

Korean Vehicles, European Vehicles, Commercial Trucks
