

Automotive Intercooler for Turbocharged Engines

This high-performance intercooler is designed for efficient cooling of intake air, enhancing engine performance. It features a robust core design for optimal heat dissipation and durable end tanks for reliable performance under high pressure.

Product Overview

High-Performance Automotive Intercooler

This high-performance intercooler is engineered specifically for turbocharged engines, focusing on efficient intake air cooling to enhance overall engine performance. By reducing thermal stress and lowering intake air temperatures, it helps improve horsepower and torque output. Designed for reliability and durability, this component is an ideal upgrade for demanding automotive applications.

Technical Specifications

| | |
|-----------------------|---------------------|
| Core Dimensions | 740*128 mm |
| OEM Reference Numbers | 0384.K1, 1347700080 |
| DPI Number | 96623 |
| Nissens Reference | 56145 |

Compatibility

Compatible Models

- DUCATO (250) 2.0 JTD
