

Automotive Internal Combustion Engine

This high-performance auto engine is designed for reliability and efficiency. It features robust construction and advanced engineering for optimal power output and fuel economy.

Overview

High-Performance Automotive Engine

This high-performance internal combustion engine is engineered for reliability and optimal power output. Designed with a robust construction, it ensures fuel economy and a smooth, responsive driving experience for various automotive applications. The unit features an efficient cooling system and is designed for easy maintenance access.

Technical Specifications

Power Output

5.5 HP

Power

Model Designation	GP160
Ignition Type	Electronic Ignition
Key Features	Durable Build, Efficient Cooling System, Easy Maintenance Access
