

# Automotive Key Programmer V33.02

This automotive key programmer programs keys and immobilizers for a wide range of vehicles. It adds new keys, reads keys from the immobilizer's memory, and deactivates keys no longer in use.

## ADDITIONAL IMAGES

## Product Overview

### Professional Immobilizer Solution

The SBB Key Programmer V33.02 is a portable diagnostic unit engineered for efficient key and immobilizer programming. It provides a menu-guided interface that simplifies complex tasks like adding new keys, deleting old ones, and programming remote controls. Designed for versatility, this tool supports a vast range of vehicle makes through a direct OBDII connection.

## Technical Specifications
