

Automotive LED Work Light

This LED work light is designed for automotive applications. Its efficient LED array and durable housing provide bright, focused light for improved visibility during repairs.

Product Overview

High-Performance Automotive Lighting

This 7-inch automotive LED work light is engineered to deliver superior illumination for demanding environments, including workshops, garages, and off-road applications. Featuring a robust 45W power output and a bright 2700-lumen beam, it ensures optimal visibility during critical repairs and maintenance tasks. The durable construction, combined with an IP67 waterproof rating, makes it a reliable lighting solution for various vehicle types and weather conditions.

Technical Specifications

Power Output	45 W
Operating Voltage	10-30V
Brightness	2700 Lumens
Color Temperature	6000-6500K

Physical Properties

Size	7 inch
Housing Material	Stainless Steel

Performance Features

Waterproof Rating	IP67
Beam Pattern	Spot, Flood
