Product Overview

Automotive Mounting Solution

This automotive plastic mounting bracket is precision-engineered for the 2018 NV350-360 vehicle model. Designed with a complex structure featuring support ribs and integrated mounting points, it ensures secure attachment and long-term durability. The component is crafted from high-grade, resilient plastic material to withstand environmental factors and maintain structural integrity.

Technical Details

Material

Durable Plastic • Reinforced Structure

Compatibility

2018 NV350-360

Design Features

Key Design Elements

- Complex support ribs for structural integrity
- Integrated mounting points
- Circular openings for component accommodation
- Vertical and angled supports
