

Automotive Rubber Edge Protector Seal

This black rubber edge protector seal provides a secure, weather-resistant seal for car doors and automotive applications. It features a U-shaped channel for easy installation and a flexible bulb seal for a tight fit, preventing water, dust, and noise intrusion.

Product Overview

Versatile Edge Protection

This black rubber edge protector seal is engineered to provide a robust, weather-resistant barrier for a wide range of industrial and automotive applications. Featuring a U-shaped channel for straightforward installation, the design includes a flexible bulb seal to effectively block water, dust, and noise. Its durable rubber construction ensures long-lasting performance and reliable protection against wear, making it an essential component for sealing doors, windows, and heavy machinery.

Applications

Usage Areas

- Car door and window seals
- Truck and wheel well spacers
- Curtain wall frames
- Garage door seals
- Container and drum sealing
- Bridge and tunnel construction

Industries Served

Automotive, Railcars, Construction, Industrial Equipment, Container Manufacturing

Product Features

Key Features

U-Shaped Channel • Flexible Bulb Seal • Weather-Resistant • Durable Rubber • Easy Installation
