

Automotive Scissor Lift 3500kg Capacity

This scissor lift is designed for automotive maintenance and repair, offering a reliable and efficient lifting solution. It ensures the safe and stable lifting of vehicles up to 3500kg, making it ideal for professional garages and auto service centers.

Overview

Professional Automotive Lifting Solution

This scissor lift is engineered for professional automotive maintenance and repair environments. Designed with robust construction and precise mechanics, it offers a reliable solution for lifting vehicles weighing up to 3500kg. Its compact footprint and durable components make it an ideal choice for garages and service centers looking to improve efficiency during undercarriage tasks.

Performance

Lifting Capacity

3500 kg
Max Load

Primary Application

Automotive Maintenance, Undercarriage Repair, Garage Equipment

Design

Design Features

- Compact footprint for space-saving
- High-durability components
- Optimized for service center workflows
