

# Automotive Steering Lock and Ignition Switch Assembly

This assembly is designed for vehicle steering and transmission systems, providing security and control. The components are made of durable materials to ensure reliable performance and longevity.

## Product Overview

### Professional Steering and Ignition Security

This automotive steering lock and ignition switch assembly provides a comprehensive security solution for vehicle ignition and steering systems. Engineered for durability, the assembly ensures reliable control and consistent performance in demanding automotive environments. It includes essential components such as the locking mechanism, ignition switch, and matching keys, making it a complete replacement or maintenance solution.

## Technical Details

### Included Components

- Steering lock mechanism
- Ignition switch
- Vehicle keys

### Core Applications

Steering System • Transmission Security • Ignition Control

### Material Specifications

Durable Construction, Automotive Grade Materials, Wear Resistant
