

Automotive Tail Lamp Assembly

This tail lamp assembly is designed for automotive use, providing essential lighting for the vehicle's rear, including brake, turn signal, and running lights. Constructed from durable materials, it withstands environmental conditions and ensures long-lasting performance, with easy installation for specific vehicle models.

Product Overview

Automotive Tail Lamp Assembly

This tail lamp assembly is designed to provide essential rear lighting functionality, incorporating brake lights, turn signals, and running lights into a single, cohesive unit. Engineered for durability and high visibility, the assembly features a red lens and precision internal reflectors to ensure safety and performance in low-light conditions. It is constructed from robust materials to withstand harsh environmental factors, offering a reliable, easy-to-install solution for vehicle maintenance.

Technical Features

Lighting Functions

- Brake Light
- Turn Signal
- Running Light
