

Automotive Tire Changer

This heavy-duty auto repair tool is designed for efficient tire changing and wheel maintenance. It features a robust construction with a red finish, incorporating a powerful motor and a control panel for precise operation.

Overview

Professional Tire Changing Solution

This heavy-duty automotive tire changer is engineered for high-efficiency wheel maintenance in professional repair environments. Featuring a robust build and precision control interface, it provides the reliability needed for frequent daily use. The integrated hydraulic system delivers the necessary force for seamless tire removal and installation, while the versatile clamping mechanism ensures stability for a wide range of wheel sizes.

Technical Specifications
