

Axial Fan for Apparel and Textile Machinery

This axial fan is designed for cooling applications in machinery and industrial parts, specifically apparel and textile machinery. It features a compact design with a black plastic frame and impeller optimized for efficient airflow and heat dissipation.

Product Overview

Industrial Cooling Performance

This square-framed axial fan is specifically engineered for cooling applications within apparel and textile machinery. The unit features a compact, robust design with an optimized multi-blade impeller, ensuring efficient airflow and effective heat dissipation in demanding industrial environments. It includes integrated mounting holes to facilitate simple installation and seamless integration into existing machinery systems.

Technical Specifications

Frame Shape	Square
Construction Material	Black plastic
Key Features	Compact design, Optimized blade airflow, Easy installation

Application

Compatible Machinery

- Apparel machinery
- Textile machinery
- General industrial cooling
