

Axial Fan for Ventilation and Air Conditioning

Three-blade axial fan designed for air conditioning and ventilation equipment. It features optimized blade geometry for efficient airflow and a central mounting hub for secure attachment to a motor shaft.

Product Overview

High-Efficiency Axial Fan

This three-blade axial fan is engineered for optimal performance in air conditioning and ventilation systems. Its durable metal construction ensures long-term reliability in demanding exhaust and cooling environments. The unit features precision-engineered blade geometry designed to maximize airflow efficiency while maintaining stable operation.

Design & Construction

Number of Blades	3
Material & Finish	Durable metal with gray finish

Installation

Mounting Mechanism	Central mounting hub for motor shaft attachment
