

Bagless Cylinder Vacuum Cleaner with HEPA Filter

This vacuum cleaner operates using suction to remove dirt from floors, carpets, walls, and furniture. It features a transparent dust container, multiple attachments, large wheels, a carry handle, and a HEPA filter.

Product Overview

High-Efficiency Cleaning Performance

This bagless cylinder vacuum cleaner utilizes an advanced suction principle to effectively remove debris from floors, carpets, walls, and furniture. Its compact, lightweight design ensures easy handling, while the high-efficiency motor delivers robust power for deep cleaning tasks. Equipped with a HEPA filter, this unit is engineered to capture allergens, promoting a cleaner and healthier indoor environment.
