

Bakelite Lamp Holder for Lighting Fixtures

This lamp holder is constructed from durable bakelite material. It provides a secure and standardized connection for light bulbs in various lighting fixtures, ensuring reliable electrical insulation and heat resistance.

Product Overview

Bakelite Lamp Holder

This durable bakelite lampholder is engineered for reliable performance in various electrical lighting applications. Constructed from high-quality bakelite and copper, it offers excellent heat resistance and electrical insulation properties. Designed to provide a secure and standardized connection, it is compatible with common bulb bases, making it an essential component for lighting fixtures.

Technical Specifications

Materials

- Bakelite
- Copper

Supported Bulb Bases

E14, E27

Model Identification

Model Numbers

LXC-L751 • LXC-L751B
