

Bare Copper Communication Wire

This bare copper wire ensures efficient signal transmission. It is suitable for internal wiring, grounding applications, and other low-voltage connections.

Product Overview

High-Conductivity Bare Copper Wire

This bare copper communication wire is engineered for high-conductivity performance in various electrical and electronic applications. Wound tightly on a plastic spool, it is designed for easy handling and efficient dispensing during installation. As an uninsulated conductor, it provides the flexibility required for grounding, internal wiring, and customized low-voltage configurations.

Technical Specifications

Insulation
Uninsulated

- Primary Applications**
- Electrical applications
 - Electronic applications
 - Internal wiring
 - Grounding
 - Low-voltage systems

Material	Bare Copper
-----------------	-------------

Packaging & Handling

Packaging	Plastic Spool
Handling Features	Easy Dispensing, Tightly Wound, Ready for Installation
