

Bathtub and Swimming Pool Water Pump

These pumps are designed for bathtub and swimming pool applications. They are engineered for efficient water circulation and filtration, ensuring clean and clear water.

Product Overview

High-Efficiency Water Circulation

The FRP Series pumps are specifically engineered for bathtub and swimming pool applications, providing reliable water circulation and filtration. Designed for durability, these units feature corrosion-resistant construction to ensure long-lasting performance in wet environments. Their robust motor design makes them a versatile solution suitable for a wide range of pool sizes and bathtub configurations.

Technical Specifications

Key Features

- Robust motor design
- Corrosion-resistant materials
- Efficient water circulation
- Easy installation

Application	Bathtub, Swimming Pool
