

Battery Jumper Clamp

This heavy-duty battery clamp features a spring-loaded mechanism for a secure connection. It is suitable for automotive, marine, and industrial applications requiring reliable electrical connections.

Overview

Heavy-Duty Battery Jumper Clamp

This heavy-duty battery jumper clamp is engineered for reliability in demanding environments, including tactical, outdoor, and recreational applications. Featuring high-quality copper clamps and jaws, it ensures optimal conductivity and a secure connection. Designed for professional use, this component delivers a robust 500AMP current capacity for consistent performance.

Technical Specifications

Rated Current

500 A

Rated Current

Material Composition

Copper Jaws, Copper Clamps

Applications

Suitable Applications

- Automotive
- Marine
- Industrial
- Welding
- Tactical
- Outdoor
- Recreational

Features

Design Features

Heavy Duty • Spring-loaded Mechanism • High Conductivity • Corrosion Resistant • Insulated Grips
