

Bearing Housing

This precision-engineered component provides support for rotating shafts and bearings. Constructed from high-quality materials, it offers durability and resistance to wear.

Product Overview

Precision-Engineered Bearing Housing

The Bearing Case-XJZ-100 is a precision-engineered component designed for machinery and industrial applications. It provides robust support and smooth operation for rotating shafts and bearings, ensuring optimal load distribution and stability. Constructed from high-quality materials, this housing offers exceptional durability and resistance to wear and tear, making it ideal for a wide range of industrial equipment.

Technical Specifications

Design Features

- Multi-tiered cylindrical design
- Central shaft configuration
- Integrated white mounting flange
- Calibrated for standard bearing compatibility

Performance Highlights

100 XJZ
Model Series

Installation & Maintenance

Installation

Easy installation, Low maintenance, Secure mounting
