

Bed Type NC Milling Machine

This bed type NC milling machine is designed for versatile and precise milling operations. Its rigid bed-type construction ensures enhanced stability and accuracy during machining.

Overview

High-Performance Bed Type NC Milling Machine

The S Series Bed Type NC Milling Machine is engineered for versatility and precision across demanding industrial applications. Featuring a rigid bed-type construction, this machine ensures superior stability and machining accuracy for complex part production. With integrated multi-axis numerical control capabilities, it is an ideal solution for professionals in the automotive, aerospace, and mold-making sectors.

Performance Metrics

Construction Type

Bed-Type • NC Controlled

Axis Configuration

X-axis, Y-axis, Z-axis

Applications

Suitable Industries

- Automotive
- Aerospace
- Mold Making
