Product Overview

High-Performance Belt Driven Compressor

This belt-driven air compressor is engineered for reliability and consistent performance in industrial environments. Featuring a robust motor and a high-grade copper cylinder, it ensures longevity and smooth operation under pressure. The horizontal tank design, combined with integrated wheels, offers excellent portability without sacrificing power, making it an ideal solution for pneumatic tool operation and maintenance tasks.

Technical Specifications

Model Number	IBL2070Y
Cylinder Material	High-grade Copper
Quality Assurance	100% Factory Tested, Full Pressure Tested

Operational Features

Maintenance

- Regular drainage required
- Simple operation
- Low maintenance design

Key Advantages

Stable Performance • Durable Design • Easy Operation • Reliable Safety

Pressure Metrics

Supported Pressure Units

- kg/cm²
- kPa
- LB/in²
- BAR
- PSI
