

Belt-Driven Drilling and Milling Machine

This milling and drilling machine is a versatile tool for metalworking. It combines the functionality of a milling machine and a drill press, allowing for a wide range of machining operations.

Overview

Versatile Machining Performance

This belt-driven drilling and milling machine is a robust solution designed for diverse metalworking tasks. Combining the functionality of a milling machine and a drill press, it offers high precision and versatility for operations such as drilling, milling, slotting, and engraving. Its sturdy construction and adjustable features ensure reliable performance for professional machining environments.

Key Features

Design Highlights

Belt-Driven • Precision Spindle • Adjustable Worktable • Coolant System

Machining Functions

Drilling, Milling, Slotting, Engraving

Technical Specifications

Model Series

- ZAY7020
- ZAY7032
- ZAY7040
- ZAY7045
