

Bench Drilling Machine

This heavy-duty bench drilling machine is designed for precision drilling in metalworking applications. It features a robust construction, adjustable spindle speed, and a sturdy worktable.

Overview

Precision Bench Drilling Machine

This bench drilling machine is engineered for high-precision tasks, making it an ideal choice for instrument and camera manufacturing environments. Built with high-quality cast iron for the spindle head, column, and base, it offers exceptional durability and stability. Its robust construction ensures reliable performance for demanding metalworking applications.

Construction & Build

Build Quality

Heavy-duty • Robust Construction

Material Composition

Cast Iron Spindle Head, Cast Iron Column, Cast Iron Base

Performance

Primary Applications

- Instrument manufacturing
- Camera manufacturing
- Metalworking
- General workshop fabrication

Precision

High precision engineering
