

Benchtop Belt and Disc Sander

This benchtop belt and disc sander is designed for small to medium-sized woodworking and metalworking projects. It features a combination of a vertical belt sander and a disc sander, providing flexibility for various sanding tasks.

Product Overview

Versatile Benchtop Sanding Solution

This combination belt and disc sander is designed for a wide range of applications, from intricate contour shaping to rapid stock removal. The unit features a flexible belt sander with a removable back plate for curved work and a precise disc sander for flat surfaces. Its compact benchtop design makes it an ideal choice for workshops where space is at a premium without sacrificing power or versatility.
