

Benchtop Grinding Machine

This benchtop grinding machine is a stationary power tool used for grinding, polishing, and buffing. It features an electric motor that drives two abrasive wheels and includes adjustable eye shields and tool rests for safety and precision.

Overview

Professional Benchtop Grinding Machine

This stationary bench grinder is engineered for versatile metalworking tasks, including grinding, polishing, and buffing. Designed for stability, it mounts securely to workbenches or stands to provide a reliable platform for sharpening tools and removing rust or paint. The unit is equipped with adjustable eye shields and tool rests to ensure operator safety and high-precision results during operation.

Technical Specifications

Motor Performance
