

Benchtop Polisher

This benchtop polisher is designed for detailed polishing work. It features a central motor housing with spindles extending from both sides and an integrated on/off switch mounted on the base.

Overview

Professional Benchtop Polisher

This benchtop polisher is a versatile tool designed for precision polishing and finishing tasks. Featuring a robust central motor housing with dual-sided spindles, it allows for efficient workflow and simultaneous use of different polishing accessories. The integrated on/off switch on the base ensures user-friendly operation, making it an essential addition to any workshop focused on detailed surface finishing.

Design & Build

Design Features

- Central motor housing
- Dual-sided spindles
- Integrated base-mounted switch
- Compact benchtop footprint

Control Interface

On/Off Switch, Manual Control

Applications

Primary Applications

Detailed Polishing • Surface Finishing • Workshop Use
