Product Overview

Precision Shifting Performance

This bicycle front derailleur is engineered for reliable and smooth gear transitions across your drivetrain. Designed to support both 18-speed and 21-speed configurations, it offers versatile compatibility for various bicycle setups. Its robust construction ensures consistent chain movement, making it an essential component for maintaining optimal riding efficiency.

Technical Specifications

Key Performance Metrics

21 speed

Max Supported Speeds

18 speed

Min Supported Speeds

Compatible Drivetrain Speeds

18 Speed, 21 Speed

Component Type

Front Derailleur

Compatibility & Features

Available Model Variants

- 520010 (21-speed)
- 520011 (21-speed)
- 520012 (18-speed)

Construction

Steel Cage • Durable Hardware
