

Bicycle Rear Derailleur Gear Shifter

This bicycle rear derailleur is a crucial component of the drivetrain system, responsible for shifting gears on the rear cassette. It is designed to be mounted to the bike frame and is adjustable via screws and bolts for precise gear changes.

Product Overview

Precision Drivetrain Component

This bicycle rear derailleur is an essential drivetrain component engineered for reliable gear shifting on rear cassettes. Designed with a durable metallic finish, it offers the mechanical robustness required for consistent performance. The unit includes an integrated jockey wheel and adjustable hardware, allowing for precise calibration to ensure smooth transitions between gears.

Technical Specifications

Component Type	Rear Derailleur
Finish	Silver metallic
Adjustment Mechanism	Screw-adjustable, Bolt-adjustable
Jockey Wheel	Included with black rubber tire

Compatibility

Mounting	Frame-mounted
