

Bicycle Suspension Fork

This bicycle suspension fork absorbs shocks and vibrations for a smoother ride. It features a black finish, a threaded steerer tube, and mounts for brakes.

Product Overview

High-Performance Suspension Fork

This bicycle suspension fork is engineered to effectively absorb shocks and vibrations, ensuring a significantly smoother ride on various terrains. Designed for integration into front suspension systems, it features a durable black finish and a reliable threaded steerer tube. Equipped with dedicated brake mounts, this component is built to enhance control and rider comfort for professional cycling applications.

Technical Specifications

Finish	Black
Steerer Tube	Threaded
Brake Mounts	Yes

Application

Compatible System	Front Suspension
