

Bicycle Tube Valve Assembly

This is an American type bicycle tube valve assembly. It comes with a removable valve core and a dust cap, and is available in 30mm and 35mm height options.

Product Overview

American Type Valve Assembly

This American type bicycle tube valve assembly is designed for reliability and ease of maintenance. Featuring a removable valve core and an included dust cap, it offers a practical solution for standard bicycle tire inflation systems. It is available in two distinct height options to accommodate different rim profiles.
