

Binocular Zoom Microscope with Articulated Arm

This binocular zoom microscope is equipped with a flexible, articulated arm stand for stability and precise positioning. Its high-quality optics provide sharp images and excellent depth of field for electronics assembly, quality control, and biological research.

Product Overview

Professional Binocular Zoom Microscope

The XTSB-3632 is a precision optical instrument engineered for detailed observation and manipulation of small components. Featuring a robust articulated arm stand, it offers exceptional flexibility and stability, allowing for precise positioning over a wide working area. The binocular viewing head provides comfortable, immersive viewing, making it ideal for electronics assembly, quality control, and detailed research tasks.

Optical Specifications

Magnification Performance

45 X

Total Magnification

108 mm

Working Distance

Zoom Range 0.7X - 4.5X

Zoom Ratio 1:6.5

Mechanical Design

Mounting and Weight

Feature	Specification
Max Clamp Opening	57 mm
Net Weight	13 kg

Head Type Binocular, 45 degree inclined, 360 degree rotation

Interpupillary Distance 55-75 mm

Diopter Adjustment ± 5 diopters
