Blind Rivets

Blind rivets, also known as pop rivets, are fasteners used to join materials together. They consist of a rivet body and a setting mandrel for secure joint creation.

Product Overview

Professional Grade Blind Rivets

Blind rivets, commonly referred to as pop rivets, are essential mechanical fasteners designed for joining two or more materials securely. This system utilizes a rivet body and a setting mandrel, which are inserted into pre-drilled holes for efficient installation. Once a setting tool pulls the mandrel, the rivet body expands to create a permanent, high-strength joint, leaving a clean and professional finish.

Technical Details

Fastener Type	Blind Rivet (Pop Rivet)
Installation Method	Mandrel pull-through expansion

Features

Key Features	High-strength joint, Clean finish, Easy installation, Permanent fastening

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
