

# Blood Storage Refrigerator 4±1

This refrigerator is designed for the safe and reliable storage of blood and blood products. It maintains a precise temperature range of 4±1 to ensure optimal preservation.

## Product Overview

### Professional Blood Storage Solution

The Blood Preserving Refrigerator is engineered for the safe and reliable storage of blood and blood products in critical environments. It maintains a precise temperature range of 4±1 to ensure optimal preservation and quality. Designed for hospitals, blood banks, and research facilities, this unit provides a secure, organized environment for temperature-sensitive materials.

## Technical Specifications

### Operating Temperature

**4 °C**

Target Temperature

**1 ±°C**

Temperature Tolerance

## Design & Features

|                       |   |
|-----------------------|---|
| Door Design           | Transparent glass door for easy visibility          |
| Storage Configuration | Multiple shelves and baskets for organized storage  |
| Monitoring            | Digital temperature display for accurate monitoring |

## Applications

|                       |   |
|-----------------------|---|
| Suitable Environments | Hospitals, Blood Banks, Research Facilities |
