

Blow Molding Machine

This blow molding machine is engineered for efficient and precise manufacturing of plastic products. It is suitable for producing a variety of hollow plastic items, including bottles, containers, and automotive parts.

Product Overview

PTB80 Series Efficiency

The PTB80 series is a specialized blow molding solution engineered for high-volume production of hollow plastic items. It is specifically optimized to handle larger containers, with a maximum capacity of 20 liters per unit. This machine focuses on output efficiency and structural reliability for industrial manufacturing environments.

Performance Metrics

Production Output

20 L

Maximum Bottle Capacity

60 pcs/h

Hourly Output

Product Compatibility

Typical Applications

Large Containers, Industrial Plastic Bottles, Hollow Plastic Products
