

Bluetooth Body Composition Analyzer

This smart scale analyzes body composition metrics, including weight and body fat percentage. It connects to smartphones via Bluetooth, allowing users to track progress through a dedicated app.

Overview

Smart Body Composition Analysis

This Bluetooth-enabled body composition analyzer provides a comprehensive overview of user health metrics beyond simple weight. Designed for precision and ease of use, it features high-accuracy sensors and a durable tempered glass platform. Through seamless smartphone connectivity, users can track long-term health trends, making it an ideal solution for fitness monitoring and wellness management.

Key Metrics

Measured Metrics	Weight, Body Fat Percentage, Muscle Mass, BMI
Sensor Technology	Yes

Technical Specifications

Connectivity	Bluetooth
Platform Material	Tempered Glass
User Profiles	Multi-user support
Display Type	Digital
