

Bluetooth Dual-Probe Digital Cooking Thermometer

This digital thermometer is designed for cooking and grilling, featuring dual probes to monitor two temperatures at once. It connects via Bluetooth for remote monitoring through a smartphone app and provides customizable temperature alerts.

Overview

Smart Dual-Probe Monitoring

The Bluetooth Dual-Probe Digital Cooking Thermometer is designed for precision grilling and cooking, allowing for simultaneous monitoring of two different temperatures. With its integrated Bluetooth connectivity, professional chefs and home cooks can remotely track temperature progress via a smartphone application. The device features durable stainless steel probes and a clear backlit display for reliable performance in various kitchen environments.

Technical Performance

Temperature Range

-40 °C

Minimum Temp

250 °C

Maximum Temp

Response Time

6 seconds

Temperature Resolution

1° over full range

Hardware & Design

Probe Material

Stainless Steel • Dual-Probe

Display Features

- LCD Screen
- LED Backlight (10 seconds)
- Dual temperature display (Cook vs Alert)
- Dual channel monitoring (T1/T2)
