

Bluetooth Headset

This is a specialized Bluetooth headset designed for clear communication. It allows hands-free operation for various applications.

Product Overview

High-Performance Composite Insulator

This high-voltage composite insulator is engineered for reliable use in electrical power transmission and distribution systems. Featuring a durable polymeric housing with specialized sheds, it provides superior insulation performance even in heavily contaminated environments. The lightweight composite construction ensures high mechanical strength and excellent resistance to tracking and erosion, making it a modern alternative to traditional ceramic insulators.

Technical Specifications

Insulation Features

- Polymeric housing
- Shed design for contamination resistance
- High tracking resistance
- Erosion resistance

Application Compatibility

AC Applications, DC Applications, Power Transmission, Distribution Systems

Construction

Material Advantages

- Lightweight design
- High mechanical strength
- Metal end fittings for secure connection
