

Bookshelf Speaker System with Center Channel

This high-fidelity bookshelf speaker system is designed for audiophiles and home theater enthusiasts. It features a three-way design with a tweeter, midrange driver, and woofer in each of the two bookshelf speakers, plus a center channel speaker.

Overview

High-Fidelity Audio Experience

The HT-50 is a high-fidelity bookshelf speaker system engineered for both audiophiles and home theater enthusiasts. Featuring a precise three-way design, the system includes a tweeter, midrange driver, and woofer in each bookshelf unit, complemented by a dedicated center channel speaker. With a sophisticated wood veneer finish, this system delivers accurate, detailed sound reproduction across a wide frequency range for an immersive listening experience.
