

Bowling Ball Return System for Children's Bowling Lanes

This is a bowling ball return system designed for children's bowling lanes. The system automatically returns bowling balls from the end of the lane back to the bowler.

Product Overview

Designed for Youth Bowling

This specialized ball return system is engineered specifically for children's bowling lanes, ensuring safe and efficient operation. It features a mechanical design that automatically retrieves bowling balls from the end of the lane and returns them to the bowler. The system is built to handle standard-sized bowling equipment while maintaining a user-friendly interface for younger players.

Technical Specifications

Key Components

- Ball return track system
- Mechanical lifting mechanism

Operation Type	Automatic mechanical ball return
Application	Children's Lanes, Youth Bowling, Commercial Bowling Centers
Compatible Ball Size	Standard
