

Braid Reinforced PVC Hose

This high-quality braid reinforced PVC hose is designed for a variety of applications. The durable hose features a reinforced braid, providing enhanced strength and resistance to pressure.

Product Overview

Braid Reinforced PVC Hose

This braid reinforced PVC hose is designed for versatility and durability in industrial and agricultural environments. Featuring a transparent, lightweight, and flexible construction, it ensures ease of handling and maneuverability. The hose maintains excellent performance under a wide range of temperatures, making it a reliable solution for fluid transfer tasks.

Performance Specifications

Operating Temperature Range

| | |
|------------------------------|------------------------------|
| -5 °C Minimum Temp | 65 °C Maximum Temp |
|------------------------------|------------------------------|

Available Variants

- Standard working pressure hose
- High working pressure hose

Suitable Applications

Water Supply, Gas Transfer, Oil Transfer, Agricultural, Industrial

Physical Properties

Key Physical Characteristics

Lightweight • Transparent • Flexible • Braid Reinforced
