Product Overview

Professional Grade Brake Disc Rotors

These high-quality brake disc rotors are engineered for stable performance and long service life. Every rotor is manufactured with precision to meet 100% OEM dimensional standards. Built with durable materials, these components provide reliable stopping power and enhanced safety for demanding automotive applications.

Technical Specifications

Composition

100% Asbestos-free

Casting Material

HT250 or American standard G3000

Quality Control

100% Qualification, 100% OEM Dimensions, Crucial dimension inspection

Commercial Terms

Minimum Order Quantity

50 pcs/item

Performance

Product Benefits

- Long service life
- Stable braking performance
- Enhanced heat dissipation
- Precision-machined surface
