

Brake Master Cylinder Assembly

This brake master cylinder assembly converts the mechanical force from the brake pedal into hydraulic pressure. It transmits pressure to the wheel cylinders or calipers to apply the brakes.

Product Overview

Brake Master Cylinder Assembly

This brake master cylinder assembly is a critical component designed for the vehicle's hydraulic braking system. It effectively converts mechanical pedal force into hydraulic pressure, ensuring reliable stopping power. Engineered for durability and performance, this unit features a robust metallic construction with precision-sealed ports for optimal fluid management.

Technical Specifications

OE Number	M52650
Item Code	M52650

Compatibility

Vehicle Application

- 2003 Nissan Altima
- 2003 Datsun Altima
