

Brass Ball Valve with Green Lever Handle

This ball valve is made from brass and features a green lever handle for manual operation. It allows for quick shut-off or opening of fluid flow in plumbing, HVAC, and industrial applications.

Product Overview

Professional Brass Ball Valve

This durable brass ball valve is engineered for reliable flow control in plumbing, HVAC, and industrial piping systems. Featuring a distinct green lever handle, it allows for quick and precise manual operation to open or shut off fluid flow. Its robust brass construction ensures excellent corrosion resistance and long-term performance in demanding environments.

Technical Specifications

Handle Color

Green

Material Composition

Brass

Operation Mechanism

Manual lever handle

Connection Type

Threaded ends

Applications

Recommended Applications

- Plumbing Systems
- HVAC Systems
- Industrial Fluid Control
